

# Drug and Alcohol Awareness Presentation during Science Night

Do you talk with your child about drugs and alcohol? Are you aware of what your child knows, or doesn't know about drugs or alcohol? Please join us in the WLC media center for a presentation on Drug and Alcohol Awareness on Friday, February 10, 2017, while your child attends our annual Science night . Parents can meet with Burrillville's Resource Officer, David Beauchemin, who will share information on the use of gateway drugs and share ways of helping your child to stay drug and alcohol free. Please bring any questions you may have. While parents are meeting in the gym, students will be at the Science presentation by the Mad Scientist.

Our 5th grade students will soon heading to the Middle School and these discussions will help parents to become more knowledgeable in learning how to be proactive against the use of drugs and alcohol. Please join us for this very important informational evening.

Please fill out and return the form below so we can prepare materials. We hope to see you there!
