

We hope that you'll join us on
Thursday, May 2, 2019 from
5:00—6:30 for our
W.L.C. Showcase of
Student Learning.

Just a few of the things you might see...

- Jump back in time to the early 1800's. Our mill workers, farmers, and mill owners will tell you all about life back during the Industrial Revolution.
 - What students in different grades are learning about science and social studies.
- STEM project exhibition- showcasing examples from the different STEM challenges completed throughout the year; Boston Tea Party
 - Check out our young musicians showcased around the building! Request a pre-selected song and enjoy!
- Legos like you've never seen! Students built portraits of famous people using only Lego bricks. Watch a video about these amazing individuals and ask our builders about the process!
- Come see our engineers show off their robots! Some members of the WLC Robotics Team will tell you how they built their robots, what they learned in the process, and they'll show you how they work.
