

READING ROCKS

Dear Parents/Guardians,

Our school is excited to participate in this year's Reading Rocks program from Monday, May 15th to Friday morning(10:00), May 19th.

This event is designed for the whole school, 2nd grade through through 5th grade, and encourages our all of our children to read as much as they can during the designated week. We will track the minutes read by each classroom. For every **thirty minutes** read at home, students will receive a brick that the class can use to build a tower, a bridge, a building... something that makes the world a better place.

How can you help? Ask your child about the reading contest, encourage them to participate and give their best reading effort, and supervise the tracking of minutes read. A tracking sheet has been sent home with your child.

Thank you for your support in the Reading Rocks program, and good luck to all of our students!
